

Environmental Policy

WEEE Recycles environmental policy

WEEE Recycle acknowledges its responsibility to, and the commercial advantages of, maintaining a sound environment. We recognize the importance no matter how small, of the impact of our activities on the environment and that there is a need to constantly consider ways in which we can conserve energy and minimize waste in all activities that we undertake. The environmental policy is defined by the Management of the organization and provides the framework for setting and reviewing environmental objectives and targets.

WEEE Recycle maintains a publicly available policy that is available either on request or on our website. The policy is communicated to all persons working for or on behalf of the organization.

Waste Management

It is our policy to work with our staff to ensure that all waste is disposed of in line with legal and environmental requirements.

Reuse and use of Recycling Materials

To utilize, and promote the use of, recycled materials whenever possible, ensuring that materials are disposed of in an environmentally safe manner at the end of their useful life.

Environmental Management Awareness

To raise and maintain a high level of understanding of, and participation in, environmental best practices by staff. Environmental objectives and targets are set and audited by the internal auditor, the Manager.
